

~~SECRET~~NPIC/D-132/61  
7 December 1961MEMORANDUM FOR: Assistant Chief of Staff for Intelligence,  
Department of the Air Force

SUBJECT : Request for Briefing on Target Data Inventory

1. In order to insure maximum coordination and utilization of products prepared at the NPIC it is desirable that appropriate NPIC personnel understand thoroughly the format, method of compilation and significance of the Target Data Inventory (TDI). While specific questions concerning the TDI have been answered or discussed during recent months by representatives of both organizations and while there is a general understanding of the TDI at NPIC, I believe that there should be a more thorough and complete basis here for anticipating, understanding and solving problems which may arise in the future.

2. I would like to request, therefore, that a briefing on the TDI be given here at the NPIC. In general it would be desirable to have it given in two parts; the first, to be an orientation to the TDI covering purpose, contents, frequency of publication, etc. This part would most benefit supervisory personnel. The second part should be a more detailed treatment of the subject followed by a question period.

3. If you agree to have one of your experienced people from AFIC come to the Center to give this briefing, I would suggest that the arrangement as to time and date be handled through Lt. Colonel Saxon, your senior representative here.

  
Deputy Director
